Beijing Great Hall of the People

1995-2012

Provide over 95% stage lighting control system and intelligent illuminating control system

Reconstruction project of indoor illuminating system of Beijing Great Hall of the People has a history of ten years, and the intelligent illuminating system after the reconstruction has more than 6000 environment lighting and stage lighting circuits and more than 20000 light fixtures, which is nowadays the indoor intelligent illuminating lighting reconstruction project with the largest scale in China.

HDL is one of the main control equipment suppliers and project undertakers for the intelligent reconstruction project of indoor illuminating system of Beijing Great Hall of the People.

The building area of the great hall of the people is 171,800 square meters, which is two or three times the area of common buildings, with a higher energy consumption. Limited by the energy-saving technology and techniques in the past years and affected by the structure and functions, its energy consumption is higher than that of the common large-scale buildings. The application of HDL energy-saving illuminating control system can provide the powerful guarantee for the great hall of the people to realize the new target of energy conservation and emission reduction.

BMW WORLD MUSEUM IN GERMANY

**Tradition and innovation
emotion and reason
power and aesthetics
the perfect combination of unique and open**

BMW Museum Center, it is symbol of Munich, Germany. The Museum is located at the side of Olympic Park and it is a Energy Saving & Multi Function Building. It shows a feeling that not only exhibit the cars, but also the culture between the cars and human being. Inside the building, except a huge Exhibition hall for the BMW cars, it also has Dinning Room, Coffee house, Club, Design Studio, Gallery and Rostrum for Young Man. Banquet and Concert will be performed here at some important festival.

As the Design and Construction Company for the Intelligent Control System of BMW Center, Eventa AG Ltd and HDL apply HDL Intelligent Lighting Control System, by using EMS Software and System Program Software to control and manage the whole system. Motion sensor installed in Rest Room and Corridor, in case of movement by human being, the lights will be turned on automatically; after somebody leave, the lights will be turned off auto. This is a conception of Energy Saving and Intelligent Control. In other areas, different scene of lights are pre-programmed and will be change according to the real circumstance. And also lights and other system can be triggered by Motion Detect and system designate. All this is under control of Logic.

KNX-DLP Multifunction LCD Switch HDL-M/DLP05.1

Description

HDL KNX / EIB Multi page- and function LCD Panels are in full compliance with European safety standards and the KNX association protocol..

Our elegant panels have high-resolution dot matrix LCD displays, rubber keys with moderate intensity and background lights. Choose between different colors and finishes – and your own user-friendly graphics. The simple to use Multi control pages are for: Lighting Control, Curtain Control, Heating Control, Clock, Air-Conditioning, Back Ground Music play and streaming... . And for other functionality. With a Built-in mini infrared receiver and the ability to send a variety of data information, the panels will control different types of KNX devices.

HDL provides application solutions for Smart Home and Building Control. Our ambition is to become a leading Global supplier by taking very seriously the challenges of delivering products protecting the Environment and the conservation of Energy to enhance a high quality, intelligent lifestyle.

Parameters

- Working Voltage 21-30 V DC
- Static Current < 25 mA
- Infrared Receive Function

Features

- Switch Control
- Dimming Control
- Curtain Control
- Shutter Control
- Scene Control
- Sequence Control
- Percentage Control (Absolute value for Dimming)
- String Control
- Combination Control
- Heating Control
- Air Condition Control
- Timer Control
- Back Ground Music Control

Additional Function

- Back Light Adjustable
- Night Mode
- Infrared Remoter Control
- Remote Lock for key
- Remote Control
- Delay Control

Optional Material

Black Glass

White Glass

Aluminum Chrome

Golden

4 Buttons Multifunction Switch HDL-M/P04.1

Parameters

- Working Voltage 21-30 V DC
- Static Current < 25 mA
- Infrared Receive Function

Additional Function

- Back Light Adjustable
- Night Mode
- Infrared Remoter Control
- Remote Lock for key
- Remote Control
- Delay Control

2 Buttons Multifunction Switch HDL-M/P02.1

Features

- Switch Control
- Dimming Control
- Curtain Control
- Shutter Control
- Scene Control
- Sequence Control
- Percentage Control (Absolute value for Dimming)
- String Control
- Combination Control
- Heating Control
- Air Condition Control
- Timer Control
- Back Ground Music Control

HDL KNX/EIB-BUS Features

- Main Function
- Statistical functions for running time of Channel
- Channel status response
- 1-On/off status can be set when Power-Down or Power up
- Timer Function
- Scene Control
- Threshold Function
- Curtain Control function
- Logic Function: And, Or, Xor, Gate
- Heating Function: PWM control output

HDL / KNX-EIB BUS relay series products are fully comply with European safety standards and protocols for High-power switching KNX equipment, internal use of 50A High-current magnetic relays, zero power consumption and long life are the features of it.

It is widely used in Airports, Metro, Sports, Parks, Building Facades, Roads, Entertainment, Public Roads, industrial Lighting control and other fields where switch control is needed.

HDL provides application solutions in the Smart Home and Building Control applications with the World leading level, Green, Environmental Protection, Energy Conservation for the purpose to create a high quality of life as the ultimate goal of intelligent.

4 Channel 16A Relay Module

HDL-M/R04.16.1

Parameter

- Working Voltage(Power Consumption): 21-30V DC
- Dynamic Current: <15mA
- Static Current: <5mA
- Dynamic Power Consumption: <450mW
- Static Power Consumption: <150mW
- Output Current: 16A
- Maximum output current: 20A
- Rated voltage: 250V AC(50/60Hz)
- Output Channel : 4 relay channels
- Electrical life time: >10000
- Mechanical life time: >100000

8 Channel 16A Relay Module

HDL-M/R08.16.1

Parameter

- Working Voltage(Power Consumption): 21-30V DC
- Dynamic Current: <15mA
- Static Current: <5mA
- Dynamic Power Consumption: <450mW
- Static Power Consumption: <150mW
- Output Current: 16A
- Maximum output current: 20A
- Rated voltage: 250V AC(50/60Hz)
- Output Channel : 8 relay channels
- Electrical life time: >10000
- Mechanical life time: >100000

12 Channel 16A Relay Module

HDL-M/R12.16.1

Parameter

- Working Voltage(Power Consumption): 21-30V DC
- Dynamic Current: <5mA
- Static Current: <15mA
- Dynamic Power Consumption: <450mW
- Static Power Consumption: <150mW
- Output Current: 16A
- Maximum output current: 20A
- Rated voltage: 250V AC(50/60Hz)
- Output Channel : 12 relay channels
- Electrical life time: >10000
- Mechanical life time: >100000

HDL KNX/EIB-BUS Features

- Statistics Total ON Time
- Status Response
- Power Down or Power On Status Setup
- Status Remains after Power On
- Staircase Light Function
- Flashing Light Function
- Scene Control
- Threshold Control
- Curtain Control
- On Delay , OFF Delay , Protection Delay
- Logic Relation: AND, OR, XOR, GATE
- Heating Control · PWM Output

HDL KNX / EIB series products for Actuators are fully complying with European safety standards and KNX association protocol. It's to be used as a high power on/off control device. Zero power consumption and Long life time are the mainly features for the Internal used 16A high current Relay unit.

The KNX/EIB actuators can be used in variety applications such as Air Port, Metro Station, Sports Center, Park, Building Wall, Public area, Street, and other areas which on/off and lighting control are needed.

HDL provides application solutions for the Smart Home and Building Control applications with the World leading level, Green, Environmental Protection, Energy Conservation, for the purpose of creating a high quality of life as the ultimate goal of intelligent.

4 Channel 10A Relay Module

HDL-M/R04.10.1

Parameter

· Working Voltage	21-30 V DC
· Dynamic Current	< 15 mA
· Static Current	< 5 mA
· Dynamic Power Consumption	< 450 mW
· Static Power Consumption	< 150 mW
· Output Current	10 A
· Max Output Current	20A
· Rated Voltage	250V AC (50/60 Hz)
· Electrical Lifetime	> 100000
· Mechanical Lifetime	> 1000000

8 Channel 10A Relay Module

HDL-M/R08.10.1

Parameter

· Working Voltage	21-30 V DC
· Dynamic Current	< 15 mA
· Static Current	< 5 mA
· Dynamic Power Consumption	< 450 mW
· Static Power Consumption	< 150 mW
· Output Current	10 A
· Max Output Current	20A
· Rated Voltage	250V AC (50/60 Hz)
· Electrical Lifetime	> 100000
· Mechanical Lifetime	> 1000000

12 Channel 10A Relay Module

HDL-M/R12.10.1

Parameter

· Working Voltage	21-30 V DC
· Dynamic Current	< 15 mA
· Static Current	< 5 mA
· Dynamic Power Consumption	< 450 mW
· Static Power Consumption	< 150 mW
· Output Current	10 A
· Max Output Current	20A
· Rated Voltage	250V AC (50/60 Hz)
· Electrical Lifetime	> 100000
· Mechanical Lifetime	> 1000000

HDL KNX/EIB-BUS Features

- Statistics total ON time
- Status Response
- Power Down or Power On Status Setup
- Short Protection
- Overload Protection
- Over Temperature Protection
- Read Temperature
- Over Temperature Alarm
- Staircase Light
- Flashing Function
- Scene Control , Scene Dimming
- Sequence Control
- Threshold Switch
- Heating Control: PWM Output

HDL KNX / EIB Trailing-Edge Technology Dimmers are in full compliance with European safety standards and the KNX association protocol. We use 20A MOSFET Copper Dimming technology with High Performance EMC Filter embedded complying with the requirements of EMC Europe. The products feature Short circuit-, overload- and overheat protection.

The dimmers may be used for dimming ordinary incandescent lamps, high pressure halogen lamps, low voltage halogen lamps and other light sources such as dimmable ballasts. At the moment we offer four types of dimmers:

- 6 channel/250W per channel
- 4 channel/ 400W per channel
- 2 channel/ 800W per channel
- 1 channel/ 1600W per channel

The KNX/EIB Dimmers may be used in a variety of applications such as for controlling lighting in Residential Homes, Hotels, Super Markets, Offices, Commercial buildings, etc.

HDL provides solutions for Smart Home and Building Control. Our ambition is to become a leading Global supplier by taking very seriously the challenges of delivering products protecting the Environment and the conservation of Energy to enhance a high quality, intelligent lifestyle.

1 Channel 6A Intelligent Dimmer

HDL-M/D01.1

Parameter

- Working Voltage : 21-30 V DC
- Dynamic Current : < 15 mA
- Static Current : < 5 mA
- Output Current : 6 Ch/1A, 4 Ch/1.5A, 2 Ch/3A, 1 Ch6 A
- Rated Voltage : 220-250V AC (50/60 Hz)

2 Channel 3A Intelligent Dimmer

HDL-M/D02.1

Parameter

- Working Voltage : 21-30 V DC
- Dynamic Current : < 15 mA
- Static Current : < 5 mA
- Output Current : 6 Ch/1A, 4 Ch/1.5A, 2 Ch/3A, 1 Ch6 A
- Rated Voltage : 220-250V AC (50/60 Hz)

4 Channel 61.5A Intelligent Dimmer

HDL-M/D04.1

Parameter

- Working Voltage : 21-30 V DC
- Dynamic Current : < 15 mA
- Static Current : < 5 mA
- Output Current : 6 Ch/1A, 4 Ch/1.5A, 2 Ch/3A, 1 Ch6 A
- Rated Voltage : 220-250V AC (50/60 Hz)

6 Channel 1A Intelligent Dimmer

HDL-M/D06.1

Parameter

- Working Voltage : 21-30 V DC
- Dynamic Current : < 15 mA
- Static Current : < 5 mA
- Output Current : 6 Ch/1A, 4 Ch/1.5A, 2 Ch/3A, 1 Ch6 A
- Rated Voltage : 220-250V AC (50/60 Hz)

HDL KNX/EIB-BUS

Features

- Master & Slave Control
- Switch Control
- Absolute Valve for Dimming
- Curtain & Shutter Control
- Intelligent Alarm Function
- Percentage Control
- Sequence Control
- Scene Control
- String Control
- Logic Control
- Status Report for Motion
- Temperature Compensation
- Temperature Report
- LUX Report
- Dry Contact Status Report

HDL-M/HS05.1
Multifunction Sensor

Parameters

- Working Voltage: 21-30 V DC
- Dynamic Current: < 15 mA
- Static Current: < 5 mA

Description

HDL KNX / EIB Multi-function Motion Sensors are in full compliance with European safety standards and the KNX association protocol. With multi-function Movement detection sensors, combined with Temperature- and LUX detection, Master & Slave control, Logic control etc. the Sensors have the ability to send a variety of data information to control different KNX devices.

HDL KNX / EIB sensors may be used for many different applications in combination with other KNX devices.

HDL provides application solutions for Smart Home and Building Control. Our ambition is to become a leading Global supplier by taking very seriously the challenges of delivering products protecting the Environment and the conservation of Energy to enhance a high quality, intelligent lifestyle.

HDL KNX/EIB-BUS

Features

- Play 24 Programs
- Record 24 Programs
- Up to 7 hours record time
- Play or Record mode can be selected
- Output Signal: DMX512-1990
- Network DMX Output Selection : HDL-NET/ART NET
- Selectable Channels : Max 48
- Selectable Channels in one scene : Max 48
- Intelligent Sequence Control
- Switch Control, Absolute Valve Dimming, Relative Valve Dimming
- Channel Status Response
- Data Exchange Between DMX and EIB

HDL-M/DMX512.1
DMX Recorder

Parameters

- DMX512 Signal in a 1990 Version
- Working Voltage: 21-30 V DC
- Dynamic Current: < 6 mA
- Static Current: < 5 mA

Description

HDL KNX / EIB series products of DMX Recorder are fully complying with European safety standards and KNX association protocol. It is a DMX control device for Entertainment. Can make record and play back DMX program from the KNX software or KNX wall panels. The maximum recording time is up to 4 hours; meantime, it supports the setting and play back of the DMX scenes.

The KNX/EIB DMX recorder can be used in variety applications such as: LED color change control, Computer Light and Moving head light control, Laser and other DMX lights control.

HDL provides application solutions for the Smart Home and Building Control applications with the World leading level, Green, Environmental Protection, Energy Conservation, for the purpose of creating a high quality of life as the ultimate goal of intelligent.

HDL KNX/EIB-BUS Features

- Blinds operation mode
- Curtain operation mode
- Manual operation
- Priority setup
- Status can be set when Power-Down or Power up
- Forced position operation
- Limit position control
- Status response for position
- Status for operation
- Scene control
- Safety control
- Automatic control

HDL KNX / EIB series products for Curtain Controllers are fully complying with European safety standards and KNX association protocol. It's to be used as a motorized control device. Zero power consumption and Long life time are the mainly features for the Internal used 16A high current Relay unit.

The KNX/EIB Curtain Controllers can be used in variety applications such as Air Port, Metro Station, Sports Center, Park, Building Wall, Public area, Street, and other areas which motorized curtain control are needed.

HDL provides application solutions for the Smart Home and Building Control applications with the World leading level, Green, Environmental Protection, Energy Conservation, for the purpose of creating a high quality of life as the ultimate goal of intelligent.

2 Channel Curtain Controller

HDL-M/W02.1

Parameter

- Working Voltage (Power Consumption): 21-30V DC
- Communication:KNX/EIB
- Dynamic current: <12mA
- Static current: <5mA
- Dynamic power dissipation: <450mW
- Static power consumption: <150mW
- Relay output current: 10A
- Rated voltage: 250V AC(50/60Hz)
- Output channel: 2 relays two channels
- Channel electrical life: >100000
- Mechanical life: >1000000

4 Channel Curtain Controller

HDL-M/W04.1

Parameter

- Working Voltage (Power Consumption): 21-30V DC
- Communication:KNX/EIB
- Dynamic current: <12mA
- Static current: <5mA
- Dynamic power dissipation: <450mW
- Static power consumption: <150mW
- Relay output current: 10A
- Rated voltage: 250V AC(50/60Hz)
- Output channel: 4 relays two channels
- Channel electrical life: >100000
- Mechanical life: >1000000

6 Channel Curtain Controller

HDL-M/W06.1

Parameter

- Working Voltage (Power Consumption): 21-30V DC
- Communication:KNX/EIB
- Dynamic current: <12mA
- Static current: <5mA
- Dynamic power dissipation: <450mW
- Static power consumption: <150mW
- Relay output current: 10A
- Rated voltage: 250V AC(50/60Hz)
- Output channel: 6 relays two channels
- Channel electrical life: >100000
- Mechanical life: >1000000

6 Channel 0-10V Ballast Dimmer

HDL-M/DA6.10.1

Parameters

- Working Voltage(Power Consumption): 21-30VDC
- Dynamic Current:<15mA
- Static Current: <6mA
- Dimming Output:DC0-10V/CH
- Dimming Output Current:20mA/CH
- Relay Channel Current: 10A/CH
- Shut off way:
Pulsed with the lock relay shut off
- Rated Voltage:220~250V AC(50/60Hz)
- Electrical life time: >100000
- Mechanical life time: >1000000

Features

- Statistics total ON time
- Status response
- Status recovery
- Upper limit
- Lower limit
- Staircase light
- Flashing light
- Scene control
- Scene dimming
- Sequence control
- Threshold switch
- Heating actuator(PWM)

960mA Power Supply for EIB BUS

HDL-M/P960.1

Parameters

- Input Supply: 220-250V AC (50/60Hz)
- KNX/EIB output Voltage: 21-30V DC
- KNX/EIB output Current: 960mA
- Power loss:<2W
- Power On time:<1s
- Electrical Lifetime: 50 years
- Mechanical Lifetime: 20 years

Features

- Short circuit protection
- Green Led:Output normal
- Red Led: Overload(>I_{max})
- Reset: push button to reset bus

4 Dry Contact Signal Input Module

HDL-M/S04.1

Parameters

- Working Voltage (Power Consumption): 21-30V DC
- Communication:KNX/EIB
- Dynamic Current: <25mA
- Static Current: <5mA
- Output Voltage: 0-10V DC
- Output Current: 3mA
- Input sensors:Switch/
Temperature sensor

Features

Switch, Temperature sensor input

- Switch controller
- Switch/Dimming controller
- Shutter controller
- Flexible controller
- Scene controller
- Sequence controller
- Percentage controller
- Threshold controller
- String controller
- Forced controller
- Counter controller
- Combination controller
- LED status indication

Logics combination

- Switch controller
- Alarm controller
- Shutter controller
- Scene controller
- Sequence controller
- Percentage controller
- Threshold controller
- String controller
- LED status indication

Dimming

- Statistics total ON time
- Status response
- Status recovery
- Staircase light
- Flashing light
- Scene control
- Scene dimming
- Sequence control
- Threshold switch
- Heating actuator(PWM)

HVAC Control Module

HDL-M/FCU07.10.1

Parameters

- Working Voltage (Power Consumption): 21-30V DC
- Communication:KNX/EIB
- Dynamic current: <20mA
- Static current: <5mA
- Dynamic power dissipation: <450mW
- Static power consumption: <150mW
- Relay output current: 10A
- Rated voltage: 250V AC(50/60Hz)
- Channel electrical life: >100000
- Mechanical life: >1000000

Features

- Five channel 10A relay outputs
- Two channel 0-10V DC outputs
- Fan speed: High, Medium,Low
- HVAC working mode: Heating, Cooling
- HVAC operation mode: Standby mode, Comfort mode, Night mode, Frost protection
- Fan speed and Valve status report
- Seven local temperature sampling
- BUS temperature sampling
- Local temperature report
- Seven channel floor heating outputs
- Five control mode each floor heating channel
- Seven channel output independently
- Channel statistics total ON time
- Channel state response
- Channel state after bus voltage failure and recovery
- Staircase light
- Delay
- PWM control output

- Power supply: DC±24V
- Static power consumption: 1.6W
- Signal Interface: HDL-BUS, RJ45, SD Card, RCA Audio, Audio output
- Audio input voltage: 0.7vpp
- Input impedance: 50KΩ
- Output impedance: RL=8Ω RR=8Ω
- Output power: 20Wx2
- Total Harmonic Distortion: < 0.05%
- Signal to Noise Ratio: 97dB
- Frequency response: 22Hz-20KHz
- Length of file name: ≤25 byte
- Music File Format: Mp3
- Communication Protocol: HDL-BUS, FTP Data exchange, UDP Data exchange
- Volume of SD Card: ≤8G
- Working Environment
- Working temperature: 0°C~45°C
- Working Relative Humidity: 20%~90%
- Storage temperature: -40°C~+55°C
- Storage Relative Humidity: 10%~93%
- Dimension: 224mm×126mm×39mm

Function

- External input
- Internal SD Card
- FM Radio
- FTP Server
- RS485 Bus Communication

1 Channel 20A Power Amplifier
SB-WL-B0120

Parameter

- Power Supply : AC220V±10%
- Working Condition:
 - Working Temperature: 0°C~45°C
 - Working Relative Humidity : 20%~90%
 - Storage Temperature : -40°C~+55°C
 - Storage Relative Humidity : 10%~93%
- Protection : Need exterior protection switch
- 1 channel output for dimming
- Current : 20A
- Wall Mount
- Dimension : 288x200x100 (mm)

Features

- Dimmable Power amplifier
- AC0~220V Power Input
- DC0~10V Control Signal Input

2 Channel 10A Power Amplifier
SB-WL-B0210

Parameter

- Power Supply : AC220V±10%
- Working Condition:
 - Working Temperature: 0°C~45°C
 - Working Relative Humidity : 20%~90%
 - Storage Temperature : -40°C~+55°C
 - Storage Relative Humidity : 10%~93%
- Protection : Need exterior protection switch
- 2 channel output for dimming
- Current : 10A
- Wall Mount
- Dimension : 288x200x100 (mm)

Features

- Dimmable Power amplifier
- AC0~220V Power Input
- DC0~10V Control Signal Input

Room Mix Controller
SB-DN-RMIX10

Parameter

- Power Supply : AC220V ±10%
- BUS Power Consumption : Built-In Power Supply
- Working Condition:
 - Working Temperature : 0°C~45°C
 - Working Relative Humidity : 20%~90%
 - Storage Temperature : -40°C~+55°C
 - Storage Relative Humidity : 10%~93%
- Output Channel :
 - 2 Channel for Dimming (300W per channel)
 - 4 Channel for relay (5A)
 - 2 Channel for Fluorescent Dimming(0~10V/20mA)
 - 2 Channel for Curtain (5A)
- Protection : Need Exterior LCB
- Installation :
 - Standard 35 mm Din Rail
- Dimension :
 - 144X88X66 (mm)

Features

- Multi-channel for output: Dimming control, On/Off control, Fluorescent lights dimming and Curtain control
- 4 buttons for scene manual control on module
- Module reset function, using the 4 buttons on module
- Low, High and Maximum limit can be set for the channel
- Need exterior protection switch
- Interface: S-BUS / 0~10V output

12 Channel 10 A, High performance intelligent dimmer
SB-WL-D1210

Parameter

- Power supply : 3 Phase (L1, L2, L3, N, PE)
- Power input : AC 220V±10%
- BUS Power Consumption : 250mA/DC24V
- Working Condition :
 - Working Temp 0°C~45°C
 - Working relative Humidity 20%~90%
 - Store Temp -40°C~+55°C
 - Store Relative Humidity 10%~93%
- Output channel : 12 channel dimming
- Current in each channel : Each channel 10A, total less than 120A
- Protection : Short and overload protection
- Installation : Wall mount
- Dimension : 600x290x162(mm)

Features

- 10 bit dimming Accurate;
- Hard ware bypass function;
- Up to 12 separated scene;
- Up to 99 scene in each area, run time;
- Up to 99 sequence, 99 steps in each sequence;
- Each sequence has 60 minutes as interval time;
- There are four types of sequence:
 - Forward / Backward / Random / Forward & Backward;
 - Low or High or Maximum Threshold are available to suit the different loads in each channel;
 - Emergency Bypass in each channel;
 - To be able to provide 250mA(DC24V) current to BUS;
 - Remark information Provided in each : scene, area, channel and sequence;
 - Remote Program and management function;
 - Can be restored to previous scene or designated scene;
 - 16A/1P protection switch in each channel.

6 Channel 20 A, High performance intelligent dimmer
SB-WL-D0620

Parameter

- Power supply : 3 Phase (L1, L2, L3, N, PE)
- Power input : AC 220V±10%
- BUS Power Supply : 250mA/DC24V
- Working Condition :
 - Working Temp 0°C~45°C
 - Working relative Humidity 20%~90%
 - Store Temp -40°C~+55°C
 - Store Relative Humidity 10%~93%
- Output channel : 6 channel dimming
- Current in each channel : Each channel 10A, total less than 120A
- Protection : Short and overload protection
- Installation : Wall mounted
- Dimension : 600x290x162(mm)

Features

- 10 bit dimming Accurate;
- Hard ware bypass function;
- Up to 6 separated scene;
- Up to 99 scene in each area, run time;
- Up to 99 sequence, 99 steps in each sequence;
- Each sequence has 60 minutes as interval time;
- There are four types of sequence:
 - Forward / Backward / Random / Forward & Backward;
 - Low or High or Maximum Threshold are available to suit the different loads in each channel;
 - Emergency Bypass in each channel;
 - To be able to provide 250mA(DC24V) current to BUS;
 - Remark information Provided in each : scene, area, channel and sequence;
 - Remote Program and management function;
 - Can be restored to previous scene or designated scene;
 - 16A/1P protection switch in each channel.

6 Channel 10A High Performance Dimmer

SB-WL-D0610

Parameter

·Power Supply	3 Phase (L1, L2, L3, N, PE)
·Power input	AC 220V±10%
·BUS Power Consumption	400mA/DC24V
·Working Condition	Working Temp 0°C~45°C Working relative Humidity 20%~90% Store Temp -40°C~+55°C Store Relative Humidity 10%~93%
·Output channel	6 channel dimming
·Current in each channel	Each channel 10A, total less than 60A
·Protection	Short and overload protection
·Installation	Wall mounted
·Dimension	600x290x162(mm)

Features

- 10 bit dimming Accurate;
- Hard ware bypass function;
- Up to 6 separated scene;
- Up to 99 scene in each area, run time;
- Up to 99 sequence, 99 steps in each sequence;
- Each sequence has 60 minutes as interval time;
- There are four types of sequence:
Forward / Backward / Random / Forward & Backward;
- Low or High or Maximum Threshold are available to suit the different loads in each channel;
- Emergency Bypass in each channel;
- To be able to provide 400mA(DC24V) current to BUS;
- Remark information Provided in each :
scene, area, channel and sequence;
- Remote Program and management function;
- Can be restored to previous scene or designated scene;
- 16A/1P protection switch in each channel.

6 Channel 2A Dimmer

SB-DN-D0602

Parameter

- Power Supply : AC220V
- BUS Power Consumption : 35mA/DC24V
- Working Condition:
Working Temperature : 0°C~45°C
Working Relative Humidity : 20%~90%
Storage Temperature : -40°C~+55°C
Storage Relative Humidity : 10%~93%
- Output Channel : 6 Channel for Dimming
- Output Current in Each Channel:
2A , 6 Channel Current Totally : 10A
- Protection : Need Exterior LCB
- Installation :
Standard 35mm Din Rail
- Dimension :
144X88X66 (mm)

Features

- LED lights for indicates the Current Channel Status;
- Has it's own Scene Controller
- Up to 6 separate Area
- Each Area has 12 scenes, Maximum Run Time :
60 minutes;
- Up to 6 sequence, 12 steps for each sequence;
- Up to 60 minutes of Interval between each step.
There are 4 running modes :
Forward , Backward , Random , Forward & Backward;
- Low or High or Maximum threshold are available in each channel to Suit the different loads;
- Has the function of remote program and management;
- Can go back to previous scene or designated scene after power on;
- Bypass function is available in each channel.

4 Channel 3A Dimmer

SB-DN-D0403

Parameter

- Power Supply : AC220V
- BUS Power Consumption : 30mA/DC24V
- Working Condition:
Working Temperature : 0°C~45°C
Working Relative Humidity : 20%~90%
Storage Temperature : -40°C~+55°C
Storage Relative Humidity : 10%~93%
- Output Channel : 4 Channel for Dimming
- Output Current in Each Channel:
3A , 4 Channel Current Totally : 10A
- Protection : Need Exterior LCB
- Installation :
Standard 35mm Din Rail
- Dimension :
144X88X66 (mm)

Features

- LED lights for indicates the Current Channel Status;
- Has it's own Scene Controller
- Up to 4 separate Area
- Each Area has 12 scenes, Maximum Run Time :
60 minutes;
- Up to 6 sequence, 12 steps for each sequence;
- Up to 60 minutes of Interval between each step.
There are 4 running modes :
Forward , Backward , Random , Forward & Backward;
- Low or High or Maximum threshold are available in each channel to Suit the different loads;
- Has the function of remote program and management;
- Can go back to previous scene or designated scene after power on;
- Bypass function is available in each channel.

2 Channel 6A Dimmer

SB-DN-D0206

Parameter

- Power Supply : AC220V
- BUS Power Consumption : 25mA/DC24V
- Working Condition:
Working Temperature : 0°C~45°C
Working Relative Humidity : 20%~90%
Storage Temperature : -40°C~+55°C
Storage Relative Humidity : 10%~93%
- Output Channel : 2 Channel for Dimming
- Output Current in Each Channel:
6A , 2 Channel Current Totally : 10A
- Protection : Need Exterior LCB
- Installation :
Standard 35mm Din Rail
- Dimension :
144X88X66 (mm)

Features

- LED lights for indicates the Current Channel Status;
- Has it's own Scene Controller
- Up to 2 separate Area
- Each Area has 12 scenes, Maximum Run Time :
60 minutes;
- Up to 6 sequence, 12 steps for each sequence;
- Up to 60 minutes of Interval between each step.
There are 4 running modes :
Forward , Backward , Random , Forward & Backward;
- Low or High or Maximum threshold are available in each channel to Suit the different loads;
- Has the function of remote program and management;
- Can go back to previous scene or designated scene after power on;
- Bypass function is available in each channel.

12 Channel 10A Relay Module
SB-DN-R1210

Parameter

- Power Supply: DC24V
- Power Consumption:
Static BUS Power Consumption: 15mA/DC24V
Dynamic BUS Power Consumption: 40mA/DC24V
- Working Condition:
Working Temperature: 0°C~45°C
Working Relative Humidity: 20%~90%
Storage Temperature: -40°C~+55°C
Storage Relative Humidity: 10%~93%
- Output Channel : 12 channel relays
- Current in Each Channel : 10A
- Life Time for Relay Unit : More than 60,000 times
- Protection : Need Exterior Protection Switch
- Installation : Standard 35 mm Din Rail
- Capacity Load of Relay : <50uF
- Dimension : 216x88x66 (mm)
- With Scene Controller itself

Features

- 12 relay channels
- Maximum 12 separate Area. Up to 24 scenes in each maximum running time of scene is 60 minutes
- Each channel has lights protection delay : 0~60 minutes
- Each channel has switch on delay time : 0~25 seconds
- Bypass function is available for each channel
- Remote Program and Management are available
- Can go back to previous scene or designated scene once the system restart
- LED lights available for indicates of each channel
- 2 sequence of each area

8 Channel 10A Relay Module
SB-DN-R0810

Parameter

- Power Supply: DC24V
- Power Consumption:
Static BUS Power Consumption: 15mA/DC24V
Dynamic BUS Power Consumption: 40mA/DC24V
- Working Condition:
Working Temperature: 0°C~45°C
Working Relative Humidity: 20%~90%
Storage Temperature: -40°C~+55°C
Storage Relative Humidity: 10%~93%
- Output Channel : 8 channel relays
- Current in Each Channel : 10A
- Life Time for Relay Unit : More than 60,000 times
- Protection : Need Exterior Protection Switch
- Installation : Standard 35 mm Din Rail
- Capacity Load of Relay : <50uF
- Dimension : 144x88x66 (mm)
- With Scene Controller itself

Features

- 8 relay channels
- Maximum 8 separate Area. Up to 16 scenes in each maximum running time of scene is 60 minutes
- Each channel has lights protection delay : 0~60 minutes
- Each channel has switch on delay time : 0~25 seconds
- Bypass function is available for each channel
- Remote Program and Management are available
- Can go back to previous scene or designated scene once the system restart
- LED lights available for indicates of each channel
- 2 sequence of each area

4 Channel 10A Relay Module
SB-DN-R0410

Parameter

- Power Supply: DC24V
- Power Consumption:
Static BUS Power Consumption: 15mA/DC24V
Dynamic BUS Power Consumption: 40mA/DC24V
- Working Condition:
Working Temperature: 0°C~45°C
Working Relative Humidity: 20%~90%
Storage Temperature: -40°C~+55°C
Storage Relative Humidity: 10%~93%
- Output Channel : 4 channel relays
- Current in Each Channel : 10A
- Life Time for Relay Unit : More than 60,000 times
- Protection : Need Exterior Protection Switch
- Installation : Standard 35 mm Din Rail
- Capacity Load of Relay : <50uF
- Dimension : 72x88x66 (mm)
- With Scene Controller itself

Features

- 4 relay channels
- Maximum 4 separate Area. Up to 8 scenes in each maximum running time of scene is 60 minutes
- Each channel has lights protection delay : 0~60 minutes
- Each channel has switch on delay time : 0~25 seconds
- Bypass function is available for each channel
- Remote Program and Management are available
- Can go back to previous scene or designated scene once the system restart
- LED lights available for indicates of each channel
- 2 sequence of each area

4 Channel 16A Relay Module
SB-DN-R0416

Parameter

- Power Supply: DC24V
- Power Consumption:
Static BUS Power Consumption: 15mA/DC24V
Dynamic BUS Power Consumption: 40mA/DC24V
- Working Condition:
Working Temperature: 0°C~45°C
Working Relative Humidity: 20%~90%
Storage Temperature: -40°C~+55°C
Storage Relative Humidity: 10%~93%
- Output Channel : 4 relay channels
- Current in Each Channel : 16A
- Life time for Relay unit : More than 60,000 times
- Protection : Need exterior Protection Switch
- Installation : Standard 35 mm Din Rail
- Capacity Load of Relay Unit : <300uF
- Dimension : 72x88x66(mm)

Features

- 4 relay channels
- Bypass function is available for each channel
- Each channel has switch on delay time : 0~25 seconds
- Area : Maximum 4 separate area
- Scene : 8 scenes in each area, maximum running time of each scene is 60 minutes
- Sequence : 2 sequence in each area, Maximum 12 steps of each sequence
- Can go back to previous scene or designated scene once the system restart
- Current Detect function is available.

8 Channel 16A Relay Module

SB-DN-R0816

Parameter

- Power Supply : DC24V
- Power Consumption:
Static BUS Power Consumption: 15mA/DC24V
Dynamic BUS Power Consumption: 40mA/DC24V
- Working Condition
Working Temperature: 0°C~45°C
Working Relative Humidity: 20%~90%
Storage Temperature: -40°C~+55°C
Storage Relative Humidity: 10%~93%
- Output Channel : 8 relay channels
- Current in Each Channel : 16A
- Life time for Relay unit : More than 60,000 times
- Protection : Need exterior Protection Switch
- Installation : Standard 35 mm Din Rail
- Capacity Load of Relay Unit : <300uF
- Dimension : 144x88x66(mm)

Features

- 8 relay channels
- Bypass function is available for each channel
- Each channel has switch on delay time : 0~25 seconds
- Area : Maximum 8 separate area
- Scene : 16 scenes in each area, maximum running time of each scene is 60 minutes
- Sequence : 2 sequence in each area, Maximum 12 steps of each sequence
- Can go back to previous scene or designated scene once the system restart
- Current Detect function is available.

12 Channel 16A Relay Module

SB-DN-R1216

Parameter

- Power Supply : DC24V
- Power Consumption:
Static BUS Power Consumption: 15mA/DC24V
Dynamic BUS Power Consumption: 40mA/DC24V
- Working Condition
Working Temperature: 0°C~45°C
Working Relative Humidity: 20%~90%
Storage Temperature: -40°C~+55°C
Storage Relative Humidity: 10%~93%
- Output Channel : 12 relay channels
- Current in Each Channel : 16A
- Life time for Relay unit : More than 60,000 times
- Protection : Need exterior Protection Switch
- Installation : Standard 35 mm Din Rail
- Capacity Load of Relay Unit : <300uF
- Dimension : 216x88x66(mm)

Features

- 12 relay channels
- Bypass function is available for each channel
- Each channel has switch on delay time : 0~25 seconds
- Area : Maximum 12 separate area
- Scene : 24 scenes in each area, maximum running time of each scene is 60 minutes
- Sequence : 2 sequence in each area, Maximum 12 steps of each sequence
- Can go back to previous scene or designated scene once the system restart
- Current Detect function is available.

6 Channel 16A 0-10V Output Module

SB-DN-6B0-10V

Parameter

- Power Supply : DC24V
- BUS Power Consumption : 30mA/DC24V
- Current in Each Channel : 16A
- Capacity Load of Relay Unit : <300uF
- Power Consumption For Module : 2W
- Control DC Maximum Current : 100mA
- Working Condition
Working Temperature: 0°C~45°C
Working Relative Humidity: 20%~90%
Storage Temperature: -40°C~+55°C
Storage Relative Humidity: 10%~93%
- Installation : Standard 35 mm Din Rail
- Dimension : 144x88x66 (mm)

Features

- 6 relay channel
- 6 channel for 0~10V analog signal output
- Bypass function is available for each channel
- LED lights available for indicates of each channel
- Maximum 6 separate Area. Up to 12 scenes in each maximum running time of scene is 60 minutes
- Can go back to previous scene or designated scene once the system restart
- Remote Program and Management are available
- Low or High or Maximum Threshold are available to suit the different loads in each channel

6 Channel 10A 0-10V Output Module

HDL-MRDA0610.232

Parameter

- Power Supply : DC24V
- BUS Power Consumption : 30mA/DC24V
- Current in Each Channel : 16A
- Capacity Load of Relay Unit : <300uF
- Power Consumption For Module : 2W
- Control DC Maximum Current : 100mA
- Working Condition
Working Temperature: 0°C~45°C
Working Relative Humidity: 20%~90%
Storage Temperature: -40°C~+55°C
Storage Relative Humidity: 10%~93%
- Installation : Standard 35 mm Din Rail
- Dimension : 144x88x66 (mm)

Features

- 6 relay channel
- 6 channel for 0~10V analog signal output
- Bypass function is available for each channel
- LED lights available for indicates of each channel
- Maximum 6 separate Area. Up to 12 scenes in each maximum running time of scene is 60 minutes
- Can go back to previous scene or designated scene once the system restart
- Remote Program and Management are available
- Low or High or Maximum Threshold are available to suit the different loads in each channel

3 Channel 650mA LED Driver
SB-LED650mA

Parameter

- Power Supply : DC24V
- Working Condition
Working Temperature: 0°C~45°C
Working Relative Humidity: 20%~90%
Storage Temperature: -40°C~+55°C
Storage Relative Humidity: 10%~93%
- Power Consumption of Module : <2W
- Output channel : RGB 3 channels
- Current in each channel : 650mA
- Signal Interface : DMX512 (1990)
- Dimension : 96x58.5x22.5 (mm)

Features

- 3 channel for LED lights, maximum 650mA
- Voltage for LED Driver : DC10-30v
- Control Signal : DMX512 (1990)

3 Channel 4A LED Driver
SB-WM-LED0304

Parameter

- Power Supply : AC220V±10%
- Frequency : 50~60HZ
- Working Condition
Working Temperature: 0°C~45°C
Working Relative Humidity: 20%~90%
Storage Temperature: -40°C~+55°C
Storage Relative Humidity: 10%~93%
- Signal Interface : DMX512 (1990)
- Output channel : RGB 3 channels(DC24V/4A)
- Controlled Light type : RGB LED light
- Installation : Wall Mount
- Dimension : 310x230x87 (mm)

DMX 48 Scene Controller
SB-DN-48DMX

Parameter

- Power Supply : DC24V
- BUS Power Consumption : 40mA/DC24V
- Working Condition
Working Temperature: 0°C~45°C
Working Relative Humidity: 20%~90%
Storage Temperature: -40°C~+55°C
Storage Relative Humidity: 10%~93%
- Installation : Standard 35 mm Din Rail
- Dimension : 144x88x66 (mm)
- Built-In Ethernet RJ45 Interface

Features

- Maximum 48 DMX areas
- Maximum 99 Scenes in Each area , Maximum running time of scene is 60 minutes
- Maximum 99 sequence and maximum steps for each sequence is 99. Maximum intervals between each steps is 60 minutes, there are 4 running mode for each sequence:
Forward / Backward / Random / Bounce
- DMX512 standard output
- HDL-BUS DMX output
- Manual Program and test on Module are available
- Remote Program and management function are available
- Low , High , Maximum threshold are available for each channel to fits different loads
- Data switcher Function :Between HDL-BUS and Ethernet
- Intelligent Data communication
- Can go back to previous scene or designated scene when turn on power of the system
- Interface : HDL-BUS , RJ45 , DMX512

DMX 512 Scene Controller
SB-DN-512DMX

Parameter

- Power Supply : DC24V
- BUS Power Consumption : 200mA/DC24V
- Working Condition
Working Temperature: 0°C~45°C
Working Relative Humidity: 20%~90%
Storage Temperature: -40°C~+55°C
Storage Relative Humidity: 10%~93%
- User Interface :
128x64 LCD Lattice Graphic
6 button for keyboard
- Installation : Standard 35 mm Din Rail
- Dimension : 144x88x66 (mm)
- Built-In Ethernet RJ45 Interface

Features

- Up to 500 scenes can be pre-programed, maximum running time of scene is 0.1s~60 minutes
- Signal Output : DMX512
- Property of Saltation and Gradual are available for each DMX channel
- Data Switcher Function : 2 way for HDL-BUS and Ethernet
- Maximum 99 show sequence, up to 255 steps for each show sequence, maximum running time of step is 0.1s~60 minutes
- For modes for each show sequence:
Forward / Backward / Random / Bounce
- Intelligent Data communication
- Software reset function, no need turn off the power
- Electrical password locker is available for illegal modification
- DMX512 Signal output (1990 Version)
- Remote Program and management function are available
- DMX512 Patching Function is available

Logic Module
SB-DN-Logic960

Parameter

- Power Supply : DC24V
- BUS Power Consumption : 15mA/DC24V
- Working Condition
Working Temperature: 0°C~45°C
Working Relative Humidity: 20%~90%
Storage Temperature: -40°C~+55°C
Storage Relative Humidity: 10%~93%
- Installation :
Standard 35 mm Din Rail
- Dimension :
72x88x66 (mm)

Features

- Events List Editable in Daily
- Maximum 12 modes in Each Day
- In each mode, 4 Logic Block can be used:
And / Or / Nand / Nor
- Logic Inputs : Time, Status of Module, Exterior inputs, Universal Switch etc...
- Remote program and management are available

2 Channel Curtain Controller

SB-DN-2Motor

Parameter

- Power Supply : DC24V
- BUS Power Consumption : 35mA/DC24V
- Working Condition : Working Temperature: 0°C~45°C Working Relative Humidity: 20%~90% Storage Temperature: -40°C~+55°C Storage Relative Humidity: 10%~93%
- Controllable Curtain : 2 curtains can be controlled
- Motor Type : Capacitive Single phase
- Maximum Current in each channel : 10A
- Life time for Relay unit : More than 60,000 times
- Installation : Standard 35 mm Din Rail
- Dimension : 72x88x66 (mm)

Features

- 2 channel for curtain control
- Modes : Forward, Backward and Stop
- Delay time for Forward and Backward is available

HDL-BUS/RS232 Convertor

SB-DN-RS232N

Parameter

- Power Supply : DC24V
- BUS Power Consumption : 15mA/DC24V
- Working Condition : Working Temperature: 0°C~45°C Working Relative Humidity: 20%~90% Storage Temperature: -40°C~+55°C Storage Relative Humidity: 10%~93%
- Installation : Standard 35 mm Din Rail
- Interface : HDL-BUS , Rs232
- Dimension : 72x88x66 (mm)

Air Condition Controller

SB-DN-HVAC

Parameter

- Power Supply : DC24V
- BUS Power Consumption : 35mA/DC24V
- Working Condition : Working Temperature: 0°C~45°C Working Relative Humidity: 20%~90% Storage Temperature: -40°C~+55°C Storage Relative Humidity: 10%~93%
- Installation : Standard 35 mm Din Rail
- Dimension : 72x88x66 (mm)

Features

- Output : 5 channel of Relay, 5A for each channel
- Fan Speed : High/Medium/Low
- Mode : Cooling/Heating
- 0~10V Output control for VAV

Pro-version RS232 Data exchange Module

SB-DN-232IP-Pro

Parameter

- Power Supply : DC15-30V
- BUS Power Consumption : 85mA/DC24V
- Working Condition : Working Temperature: 0°C~45°C Working Relative Humidity: 20%~90% Storage Temperature: -40°C~+55°C Storage Relative Humidity: 10%~93%
- Installation : Standard 35 mm Din Rail
- Interface : HDL-BUS , Rs232
- Dimension : 72x88x66 (mm)

DMX Recorder

SB-DN-DMX

Parameter

- Power Supply : DC24V
- BUS Power Consumption : 200mA/DC24V
- Working Condition : Working Temperature: 0°C~45°C Working Relative Humidity: 20%~90% Storage Temperature: -40°C~+55°C Storage Relative Humidity: 10%~93%
- User Interface : 128x64 LCD Lattice Graphic 6 button for keyboard
- Installation : Standard 35 mm Din Rail
- Dimension : 144x88x66 (mm)
- Built-In Ethernet RJ45 Interface

Features

- Memory : 256MB
- PC Remote Operation Download Program Play Program Delete Program
- Interface : HDL-BUS, RJ45
- Operation on Module Record Play: Single or Recycle Delete
- Program can be played from Panel and switch
- Others DMX output can be NET-DMX DMX512 Protocol Password function available IP function available Can check the Memory details

SMS Module

SB-DN-SMS/IP

Parameter

- Power Supply : DC24V
- BUS Power Consumption : 500mA/DC24V
- Working Condition : Working Temperature: 0°C~45°C Working Relative Humidity: 20%~90% Storage Temperature: -40°C~+55°C Storage Relative Humidity: 10%~93%
- User Interface : 128x64 LCD of Lattice Graphic 6 button for keyboard
- Installation : Standard 35 mm Din Rail
- Dimension : 144x88x66 (mm)

Features

- SMS Control : 99x49 Targets
- Status Check Function is Available
- Alarm Function by SMS or Phone is available for Security system
- Intensity of LED back light adjustable
- Multi-Control Targets is available
- Can reset with out power off
- Remote program and management function are available
- Working with timer and logic, for security enable and disable
- SMS , HDL-BUS and Ethernet data transmission
- Intelligent Data transfer, less data streaming
- Manual Control by sending little character to system.

48 Channel DALI Controller
SB-DN-DALI48

Parameter

- Power Supply : AC220V±10%
- BUS Power Consumption : Built-In Power Supply
- Working Condition
- Working Temperature: 0°C~45°C
- Working Relative Humidity: 20%~90%
- Storage Temperature: -40°C~+55°C
- Storage Relative Humidity: 10%~93%
- Signal Interface : HDL-BUS, DALI, RJ45
- Installation : Standard 35 mm Din Rail
- Dimension : 144x88x66 (mm)

Features

- Signal Convert between HDL-BUS and DALI
- All other DALI device can be controlled
- With scene controller Itself
- Maximum have 48 separate area
- Low and High Threshold, System Failed, DALI Device restore etc. functions are available
- Remote program and Management function are available
- Can go back to previous scene or designated scene once the system restart

IR Emitter with Current Sensor
SB-IR-EM

Parameter

- Power Supply : DC24V
- Power Consumption : 12mA/DC24V
- Working Condition:
- Working Temperature: 0°C~45°C
- Working Relative Humidity : 20%~90%
- Storage Temperature : -40°C~+55°C
- Storage Relative Humidity : 10%~93%
- Interface : HDL-BUS
- Maximum Infrared codes : 253
- Sending Carrier Wave Frequency : 38KHz
- Dimension : 49x31x12 (mm)
- Current Detect Function is available

4 Zone Dry Contact Input Module
SB-DRY-4Z

Parameter

- Power Supply : DC12~30V
- BUS Power Consumption : 20mA/DC24V
- Output Signal : HDL-BUS
- Working Condition:
- Working Temperature: 0°C~45°C
- Working Relative Humidity : 20%~90%
- Storage Temperature : -40°C~+55°C
- Storage Relative Humidity : 10%~93%
- Dimension : 49x31x12 (mm)

Features

- 4 channel for Dry Contact input
- Control Targets : Scene, Sequence, Timer, Universal Switch, Single channel regulate

Temperature and humidity sensor
SB-CMS-THL

Parameter

- power supply: DC24V
- Bus consumption: 25mA/DC24V
- Output signal: HDL-BUS signal
- Working environment
- Working temperature: 0°C~40°C
- Working Relative Humidity: 20%~90%
- Storage temperature: -40°C~+55°C
- Storage Relative Humidity: 10%~93%
- Installation mode: Ceiling Mount
- Dimension: 80mmx25mm

Features

- Embedded with Temperature sensor, LUX sensor, humidity sensor, 2 Dry Contact inputs, 2 external inputs total of 9 input conditions
- 2 Logic relations OR, AND .
- Up to 24 Logic functions, each logic function can be set 7 input conditions and 20 target outputs.
- Can be used with security module.
- On-site simulation function.
- RS485 Bus communication

Air quality sensor
SB-CMS-LA

Parameter

- power supply: DC24V
- Bus consumption: 25mA/DC24V
- Output signal: HDL-BUS signal
- Working environment
- Working temperature: 0°C~40°C
- Working Relative Humidity: 20%~90%
- Storage temperature: -40°C~+55°C
- Storage Relative Humidity: 10%~93%
- Installation mode: Ceiling Mount
- Dimension: 80mmx25mm

Features

- Embedded with LUX sensor, air quality sensor, 2 Dry Contact inputs, 2 external inputs total of 9 input conditions
- 2 Logic relations: OR, AND .
- Up to 24 Logic functions, each logic function can be set 7 input conditions and 20 target outputs.
- Can be used with security module.
- On-site simulation function.
- RS485 Bus communication

12in1 (Multi function Sensor)

SB-CMS-12IN1

Parameter

- Power Supply : DC24V
- BUS Power Consumption : 150mA/DC24V
- Working Condition:
Working Temperature: 0°C~40°C
Working Relative Humidity : 20%~90%
- Storage Temperature : -40°C~+55°C
Storage Relative Humidity : 10%~93%
- Interface : HDL-BUS
- Installation : Ceiling Mount
- Dimension : 108x34 (mm)

Features

- PIR motion sensor
- Ultrasonic motion sensor
- LUX sensor
- Temperature sensor
- 2 Dry contacts input
- IR receiver
- IR Emitter
- 2 channels 5A relays output
- Constant LUX control
- Security
- Easy setting
- Logic

Infrared Learner

SB-IR-Learn

Parameter

- Working Condition:
Working Temperature: 0°C~45°C
Working Relative Humidity : 20%~90%
- Storage Temperature : -40°C~+55°C
Storage Relative Humidity : 10%~93%
- Dimension : 98x70x38 (mm)
- USB Interface
- For Learning Infrared Codes
- Sending Learned IR codes for Test

Infrared Motion Sensor

SB-CMS-PIR

Parameter

- Power Supply : DC24V
- BUS Power Consumption : 12mA/DC24V
- Working Condition:
Working Temperature: 0°C~45°C
Working Relative Humidity : 20%~90%
- Storage Temperature : -40°C~+55°C
Storage Relative Humidity : 10%~93%
- Detective Range : 5x5 meters
- Detective Angle : 110 degree
- Interface : HDL-BUS
- Detective Distance adjustable by software
- Dimension : 80x28 (mm)

DC24V 750mA Power Supply

SB-DN-PS750

Parameter

- Power Supply : AC220V±10%
- Frequency : 50~60HZ
- Power Supply to BUS : 750mA
- Output Voltage : DC24V
- Working Condition:
Working Temperature: 0°C~45°C
Working Relative Humidity : 20%~90%
- Storage Temperature : -40°C~+55°C
Storage Relative Humidity : 10%~93%
- Installation : Standard 35 (mm) Din Rail
- Dimension : 72x88x66 (mm)

Power Meter Module

SB-DN-PM0301

Parameter

- Power Input : DC24V
- BUS Power Consumption : 20mA/DC24V
- Working Condition:
Working Temperature: 0°C~45°C
Working Relative Humidity : 20%~90%
- Storage Temperature : -40°C~+55°C
Storage Relative Humidity : 10%~93%
- Installation :
Standard 35(mm) Din Rail
- Dimension : 72x88x66 (mm)

Features

- Real Time monitor of Voltage and Current of A/B/C Phase;
- Reporting Electrical degree value (KWH) of each circuit;
- Has the interface of HDL-BUS;
- Need to be worked with Current Transformer, 3 types of Current Transformer are available:
50A/5A 100A/5A 200A/5A
- Monitored by HDL-BUS software;
- Show the voltage and current status in HAC Software;
- Current can be checked daily or monthly.

Current Transformer
SB-CUR50A: 50A/5A
SB-CUR100A: 100A/5A
SB-CUR200A: 200A/5A

Wall Mount Infrared Motion Sensor
SB-WMS-PIR

Parameter

- Power Supply : DC12~30V
- BUS Power Consumption : 15mA/DC24V
- Working Condition:
- Working Temperature: 0°C~45°C
- Working Relative Humidity : 20%~90%
- Storage Temperature : -40°C~+55°C
- Storage Relative Humidity : 10%~93%
- Detectable Range : 12 meters
- Detectable angle : 110°C
- Interface : HDL-BUS
- Detective distance is adjustable by software
- Dimension : 103.6x60.2x60 (mm)
- Wall Mount

8 In 1 Sensor
SB-CMS-8in1

Parameter

- Power Supply : DC12~30V
- BUS Power Consumption : 12mA/DC24V
- Working Condition:
- Working Temperature: 0°C~45°C
- Working Relative Humidity : 20%~90%
- Storage Temperature : -40°C~+55°C
- Storage Relative Humidity : 10%~93%
- Interface : HDL-BUS
- Dimension : 80x39.2 (mm)

Features

- Built-In IR Motion detector and LUX sensor
- 2 channel for Dry Contact input
- Maximum 32 Logic Block
- Maximum 5 inputs for the Logic Verdict
- Maximum 10 control targets for each Logic Block
- Infrared receiving function is available
- Infrared sending function is available

1200mA Din Rail Power Supply Module
SB-DN-PS1200

Parameter

- power supply: AC 220V±10%
- Frequency: 50-60HZ
- Output current: 1200mA
- Output voltage: DC24V
- Working environment
- Working temperature: 0°C~40°C
- Working Relative Humidity: 20%~90%
- Storage temperature: -40°C~+55°C
- Storage Relative Humidity: 10%~93%
- Installation mode: standard 35mm din rail mount.
- Dimension: 144mmx88mmx66mm

2400mA Din Rail Power Supply Module
SB-DN-PS2400

Parameter

- power supply: AC 220V±10%
- Frequency: 50-60HZ
- Output current: 2400mA
- Output voltage: DC24V
- Working environment
- Working temperature: 0°C~40°C
- Working Relative Humidity: 20%~90%
- Storage temperature: -40°C~+55°C
- Storage Relative Humidity: 10%~93%
- Installation mode: standard 35mm din rail mount.
- Dimension: 144mmx88mmx66mm

EIB/HDL-BUS Converter
SB-DN-EIB

Parameter

- Power Supply : DC24V
- BUS Power Consumption : 15mA/DC24V
- Working Condition:
- Working Temperature: 0°C~45°C
- Working Relative Humidity : 20%~90%
- Storage Temperature : -40°C~+55°C
- Storage Relative Humidity : 10%~93%
- Interface : HDL-BUS
- Installation : Standard 35 mm Din Rail
- Dimension : 72x88x66 (mm)

Features

- 2 Way data signal convert for HDL-BUS and EIB
- 2 Way function convert for HDL-BUS Single channel Dimming and EIB Standard Dimming and On/Off
- 2 Way for control targets, maximum 75 devices

Infrared Remoter
SB-HHR-D

Features

- Power : Battery (AAA*2)
- Sending Distance : 10M
- Use together with Wall panel with IR
- Dimension : 126×65.5×15(mm)

IP Interface
SB-DN-1IP

Parameter

- Power Supply : DC12~30V
- BUS Power Consumption : 40mA/DC24V
- Working Condition:
- Working Temperature: 0°C~45°C
- Working Relative Humidity : 20%~90%
- Storage Temperature : -40°C~+55°C
- Storage Relative Humidity : 10%~93%
- Available for 1 subnet for BUS products
- Interface : HDL-BUS , RJ45
- Installation : Standard 35 mm Din Rail
- Dimension : 72x88x66 (mm)

Features

- 2 Way data communication for HDL-BUS and TCP/IP
- Reset function no need power off
- Intelligent Data Transfer
- Remote program will be available

Advanced Security Controller
SB-DN-SEC250K

Features

- Support up to 250,000 zones
- 24 hours zones, Fire, Gas, Panic, silence Panic, Current, Freeze Alarm
- ALL security modes, vacation, away, night, night with guest, day, OFF
- Auto Arming, Disarming
- All type of sensors, NC, NO, Analog
- Dial out, SMS, Alert, sends you SMS

HDL-BUS System Program Software
SB-SW-Pack

Description
HDL-BUS software is the system programming Software
For all the HDL-BUS products

iRidium home intelligent control software
(For iPhone)
iRidium home intelligent control software
(For iPad)

Product specification

- With assistance from the panel designed which has been well set,this product can help to control the intelligent bus system
- Allows the user to create a vivid flash interface.
- Can upload graphical interface (GUI editable or AMX TPDesign4 iPad/iPhone/iPod), besides it can make the interface (IRPTP4) format and release it to the equipment of Windows XP/7, Windows Mobile/CE
- At the same time, it support two or multiple equipments or through using Ethernet/wireless internet, it can control a interactive equipment application.

HDL-iLife home intelligent control software
(For iPhone)
HDL-iLife home intelligent control software
(For iPad)

Product specification

The Prevail UI interface is designed by the domestic top designers, UI interactive interface to lead a more intuitive display, Ilife is an easy operating application. Through the main interface, you can realize real-time temperature, humidity and the air quality . Master control function for the electrical equipment can be fulfilled by the zone control. Zone control includes the curtain, lights, electrical equipments, wireless and multichannel control. ILIFE also provides the user-defined control for curtain, TV, DVD, air-condition, background music, multimedia server and scene, just one click to swtich the scenes, security monitoring throught the camera could provide you with the real-time security information.

Hotel Rooms Intelligent Control System

Energy Saving Conception
User-Friendly Control
Good for Management

Intelligent ID Identify

Identified by the Card, Owner or Servant. Purview is differ according to ID. Security and Energy Saving at the same time.

Temperature Control

Easy to be controlled by Panel & Switch, Energy Saving. Make a nice and comfort environment in hotel room.

Motorized Curtain Control

Controlled by wall mount panel & switch, enjoy the intelligent control way of life.

Motion Detect

Controlled in a Logic Way: Man is Coming, lights turn on; Man is leaving, lights turn off automatically.

Service Information

Service Remind:
 DND, Clean, Service Customize, Check-Out Remind;
Customer Room Remind:
 Easy for chambermaid's work. Do not disturb customer;
Waiting Mode:
 When other customer come, remind that please wait for moment.

Network Management

Room Status:
 Easy to check if somebody in room by using Software. It is good feeling for management;
Check out Request:
 One Key for check out request, in reception, check out documents will be ready, save the time for customer;
Servant Status:
 Through software, easy to find the location of the waiter, Captain can have good assignment;
Remote Control:
 When customer check-in in the reception, lights & Air Condition can be turned on before customer go to the room
Failer Detect:
 All status of equipment which inside Hotel can be monitored by system software;
History Check:
 Provide the History Report of Device & Room etc;
Room Central Control:
 Based on TCP/IP network, more stability and good for management;
Manage Date Share:
 System can be easily integrated with Hotel Software;

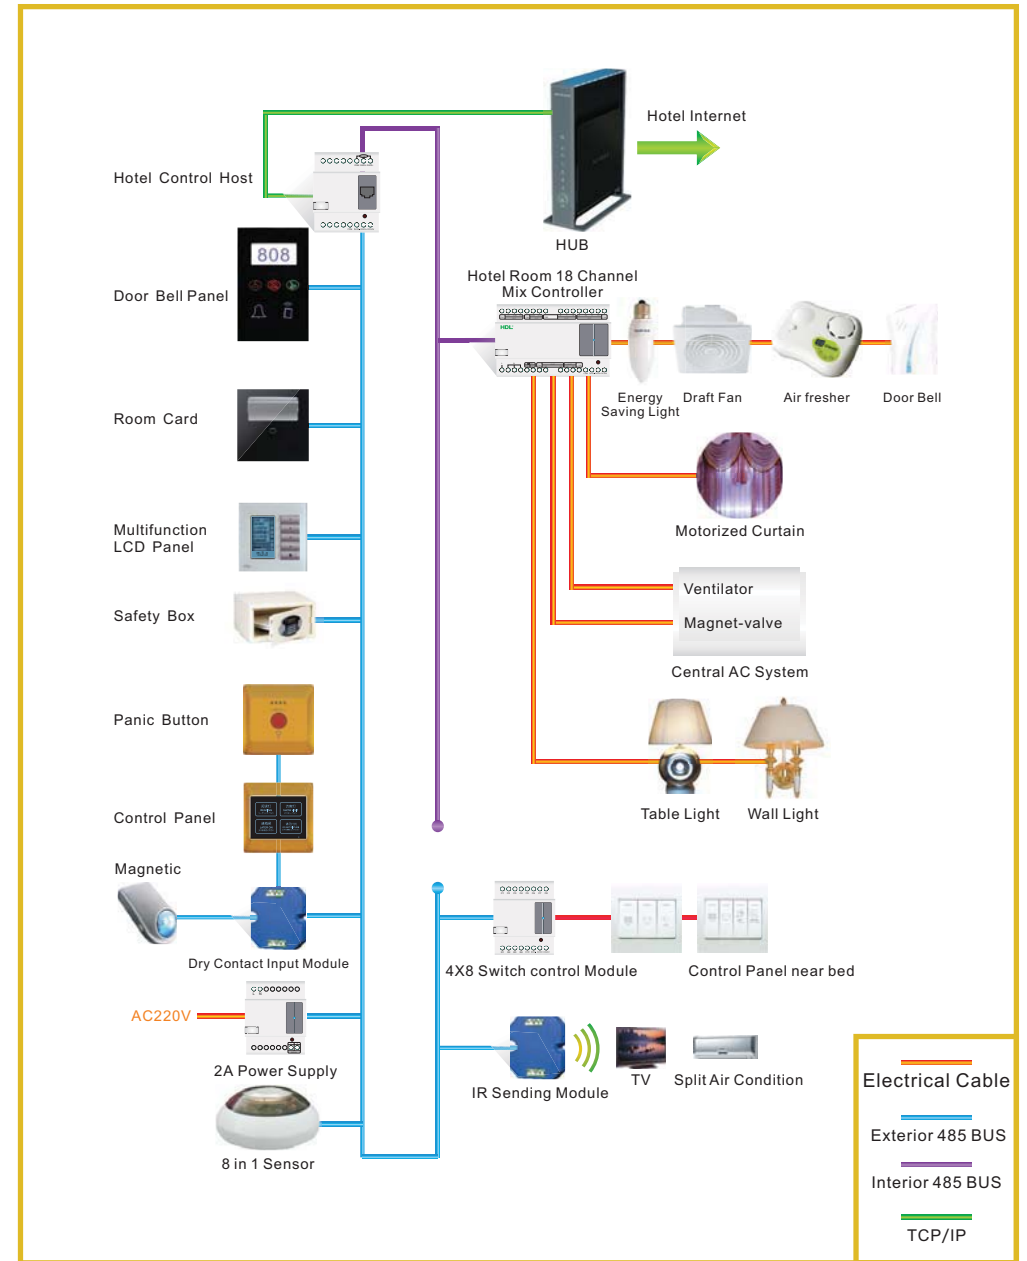

Lighting Control user friendly

By using Switch & Panel, easy to control the scenes of lights shows a nice and comfort feeling.

Security

Emergency, asking for help:
 When there is Emergency Situation in hotel Room, chambermaid will know right away;
System Break Down Remind:
 When system break Down, System will reminds the Manage Man, to solve the problem right away, Show higher efficiency.
Safety:
 Inside the system, all control unit use lower power, DC24V, make sure it is maximum safe.

Modernize Series Hotel Door Bell
SB-3S-Bell
SB-3S-Bell-XS

■ **Parameter**

Power Supply:	DC12~30V
BUS Power Consumption :	25mA/DC24V
Working Condition:	Working Temperature: 0°C~40°C Working Relative Humidity: 20%~90% Storage Temperature: -40°C~+55°C Storage Relative Humidity: 10%~93%
Signal Interface:	HDL-BUS
Layout :	105mm x 170mm x 40mm
Back box size:	94mm x 159mm x 30mm

■ **Features**

- Show different Number of Room
- Do Not Disturb
- Clean Mode
- Wait Mode
- Support RF Card(SB-3S-Bell-XS)

Modernize Series RF Hotel Master Card
SB-RF-MSTR

■ **Parameter**

Power Supply:	DC12~30V
BUS Power consumption:	15mA/DC24V
Working Condition:	Working Temperature: 0°C~40°C Working Relative Humidity: 20%~90% Storage Temperature: -40°C~+55°C Storage Relative Humidity: 10%~93%
Signal Interface:	HDL-BUS
Layout:	86mm x 86mm x 9mm
Installation:	GI 86mm×86mm Back Box

■ **Features**

- To be used together with Door Bell panel;
- Can be used as Master Card and ID identify;
- RF card.

Modernize Series Hotel Multifunction panel
SB-DLP5-GRMS

■ **Parameter**

Power supply:	DC12~30V
BUS Power Consumption:	15mA/DC24V
Working Condition:	Working Temperature: 0°C~40°C Working Relative Humidity: 20%~90% Storage Temperature: -40°C~+55°C Storage Relative Humidity: 10%~93%
Signal Interface:	HDL-BUS
Installation:	GI 86mmX86mm Back Box
Layout Size:	86.4mm×86.4mm×35mm

■ **Features**

- IR :
- IR Receiving function of each button on the panel
- Key Mode :
- Single On/Off, Single On, Single Off, Combination On, Combination Off, Momentary.
- Control Mode :
- Scene, Sequence, Timer, Universal Switch, Single Channel Control, Broadcast Scene, Broadcast Channel, Curtain Control.

- LCD Display:
- Show Different Picture or Different Language;
- LCD Back light :
- LED brightness can be adjustable ;
- Has the function of Remote Program and Management;
- Has the function of Password Setting ;
- 4 button for Function key, 1 button for Page Change;

■ **Operation Interface**

Air Condition Control

Lighting Control

Curtain Control

System Service

Scene Control

Modernize Series Intelligent Panel SB-WS3m-UK

Parameter

Power supply:	DC12~30V
Power Consumption in BUS:	15mA/DC24V
Working Condition:	Working Temperature: 0°C~40°C
	Working Relative Humidity: 20%~90%
	Storage Temperature: -40°C~+55°C
	Storage Relative Humidity: 10%~93%
Signal Interface:	HDL-BUS
Installation:	GI 86mmX86mm Back Box
Layout Size:	86.4mm×86.4mm×35mm

Features

IR : IR Receiving Function of the Key Button
 Key Control Mode : Scene, Sequence, Timer Channel, Universal Switch, Single Channel Control, Broadcast Scene, Broadcast Channel, Curtain Control
 LED Back Light: LED Brightness can be adjustable
 Key Mode : Single On-Off, Single On, Single Off, Combination On, Combination Off, Momentary
 ID Setting: ID can be changed by software of Manual; Remote Control and Management;

Different Combination for Button

Selectable Material for Panel

Touch Series Hotel Room Door Bell Panel SB-3S-Bell-Edge

Parameter

Power Supply:	DC12~30V
Power Consumption in BUS :	25mA/DC24V
Working Condition:	Working Temperature: 0°C~40°C
	Working Relative Humidity: 20%~90%
	Storage Temperature: -40°C~+55°C
	Storage Relative Humidity: 10%~93%
Signal Interface:	HDL-BUS
Layout :	86mm x 86mm x 9mm
Back box size:	86mm x 86mm Back Box

Features

Show different Number of Room
 Do Not Disturb
 Clean Mode
 Wait Mode

Touch Series Hotel Master Card SB-RF-MSTR-Edge

Parameter

Power Supply:	DC12~30V
Power consumption in BUS:	15mA/DC24V
Working Condition:	Working Temperature: 0°C~40°C
	Working Relative Humidity: 20%~90%
	Storage Temperature: -40°C~+55°C
	Storage Relative Humidity: 10%~93%
Signal Interface:	HDL-BUS
Layout:	86mm x 86mm x 9mm
Installation:	GI 86mm×86mm Back Box

Features

To be used together with Door Bell panel;
 Can be used as Master Card and ID identify;
 Two kinds: By touch or With RF card.

Touch Series Hotel Room Control Panel SB-WS4-Edge

■ Parameter

Power Supply: DC12~30V
 Power Consumption in BUS: 15mA/DC24V
 Working Condition: Working Temperature: 0°C~40°C
 Working Relative Humidity: 20%~90%
 Storage Temperature: -40°C~+55°C
 Storage Relative Humidity: 10%~93%
 Signal Interface: HDL-BUS
 Layout Size: 86mm x 86mm x 9mm
 Installation: GI 86mm x 86mm Back Box

■ Features

Control Mode	Single On/Off	Combination On	Double Click/Single On-Off
	Single On	Combination Off	Double Click/Combination On-Off
	Single Off	Combination On/Off	Momentary
Control Type	Scene	Universal Switch	Broadcast Scene
	Sequence	Single Channel	Broadcast Channel
	Timer	Curtain	

Touch Series Hotel Radio Control Panel SB-FM-Edge

■ Parameter

Power Supply: DC12~30V
 Power Consumption in BUS: 15mA/DC24V
 Working Condition: Working Temperature: 0°C~40°C
 Working Relative Humidity: 20%~90%
 Storage Temperature: -40°C~+55°C
 Storage Relative Humidity: 10%~93%
 Signal Interface: HDL-BUS
 Layout Size: 86mm x 86mm x 9mm
 Installation: GI 86mm x 86mm Back Box

■ Features

Up to 16 different Channel for Radio Station
 Volume Regular
 Radio Channel selection

■ Selectable Panel Style

Touch Series Hotel Room Air Condition Control Panel SB-AC-Edge

■ Parameter

Power Supply: DC12~30V
 Power Consumption in BUS: 15mA/DC24V
 Working Condition: Working Temperature: 0°C~40°C
 Working Relative Humidity: 20%~90%
 Storage Temperature: -40°C~+55°C
 Storage Relative Humidity: 10%~93%
 Signal Interface: HDL-BUS
 Layout Size: 86mm x 86mm x 9mm
 Installation: GI 86mm x 86mm Back Box

■ Features

To be used together with Mix Room Controller
 Control Temperature, Speed, Mode, On/Off
 Display Indoor Temperature, Date
 Has the function of Remote Control and manage

Adjustable Color

Modernize Series Hotel Room Multifunction Panel(Multi Media Connector)
SB-MMS5-Black

Modernize Series Hotel Room Multifunction Panel(Multi Media Connector)
SB-MMS5-White

Modernize Series Hotel Room Multifunction Panel(Multi Media Connector)
SB-MMS3-Black

Power Socket
SB-PS-10A

Data Outlet
SB-PC-1P

Telephone Outlet
SB-TEL-1P

Panic Button Panel
SB-EM-1P

24 zone dry contact input module SB-DRY-24Z

Parameter

Power supply: DC24V
 Bus power consumption: 10mA/DC24V
 Working environment
 Working temperature: 0°C~45°C
 Working Relative Humidity: 20%~90%
 Storage temperature: -40°C~+55°C
 Storage Relative Humidity: 10%~93%
 Installation: standard 35mm din rail mount
 Dimension: 144mmx88mmx66mm

Features

24 channels dry contact input
 Switch types include: Mechanical switches, single-On, single-Off, Single-On/Off, combination on, combination off, combination on/off, invalid switch (both mechanical switch and combination switch can set maximum 49 targets.)
 Control target type: scenes, sequences, universal switches, single channel adjustment, broadcast scene, broadcast channel, curtain control, panel control, GPRS function and so on.
 RS485 Bus communication

Hotel Room Intelligent System Manage Software SB-SW-GRMS

Description

《Hotel Room Intelligent System Manage Software》 is a monitor and Program software for the Smart-Hotel System, stability and also High efficiency. Controlled Subsystem including: Door Access; Air Condition, Lighting, Music, Service, Curtain etc. Can show customer the status about all devices inside Hotel Room, easy for management and Program.

Features

- Easy for Program and Operate based on Graphic icon;
- User-defined material, show the reality picture about the Hotel Room;
- “SOS” “Safty Box Protection” and many other function;
- Energy Saving Control function of the Air Condition;
- Intelligent ID Identify, more safety for Customer;
- Date back up and Restore Function;
- All controlled device an be show under Graphic icon;

Software Interface

Hotel Room

Check Room Number

Lighting System Configure

Air Condition Manage

Curtain Control Manage

Fan and Central Air Condition

Other Information Configure

Customer Unique Information Manage

Switch Configure Manage

Hotel Room Control Host SB-DN-48HNET

Parameter

Power Supply: DC12~30V
 Power Consumption in BUS: 40mA/DC24V
 Working Condition:
 Working Temperature: 0°C~40°C
 Working Relative Humidity: 20%~90%
 Storage Temperature: -40°C~+55°C
 Storage Relative Humidity: 10%~93%
 Installation: Standard 35(mm) Din Rail
 Layout Size: 72(mm)x88(mm)x66(mm)

Features

1 Separate Area;
 99 Scene, Maximum 255 seconds for Each Scene;
 High Limit, Low Limit, Threshold for Each channel;
 Delay Time For Channel Protection: (0—60 Minutes);
 Delay Time For Channel Start: (0—25 Seconds);
 Local Program And Test Function;
 Remote Program And Manage Function;
 Designate Scene after Device Restart;
 BUS Switch Board Function: 2 Way Date Transfer between HDL-BUS and Ethernet;
 Ethernet Interface Embedded.

Multi Function Output Module SB-DN-HMIX18

Parameter

Power Supply: DC15~30V
 Power Consumption in BUS: 260mA/DC24V
 Working Condition:
 Working Temperature: 0°C~40°C
 Working Relative Humidity: 20%~90%
 Storage Temperature: -40°C~+55°C
 Storage Relative Humidity: 10%~93%
 Signal Interface:
 RS485 —Connected with Interior BUS of Room Host
 Installation : Standard 35(mm)Din Rail
 Layout Size: 144(mm)x88(mm)x66(mm)

Features

Channel 1-5:
 1. To be used as Relay channel, 10A in each channel
 2. To be used as Air Condition Control channel:
 channel 1-3 connect as Low-Middle-High Mode;
 Channel 4-5 connect as Cool and Heat Mode;
 Channel 6-16:
 Relay channel, 10A in each channel
 Channel 17-18:
 Dimming channel, 2A in each channel.
